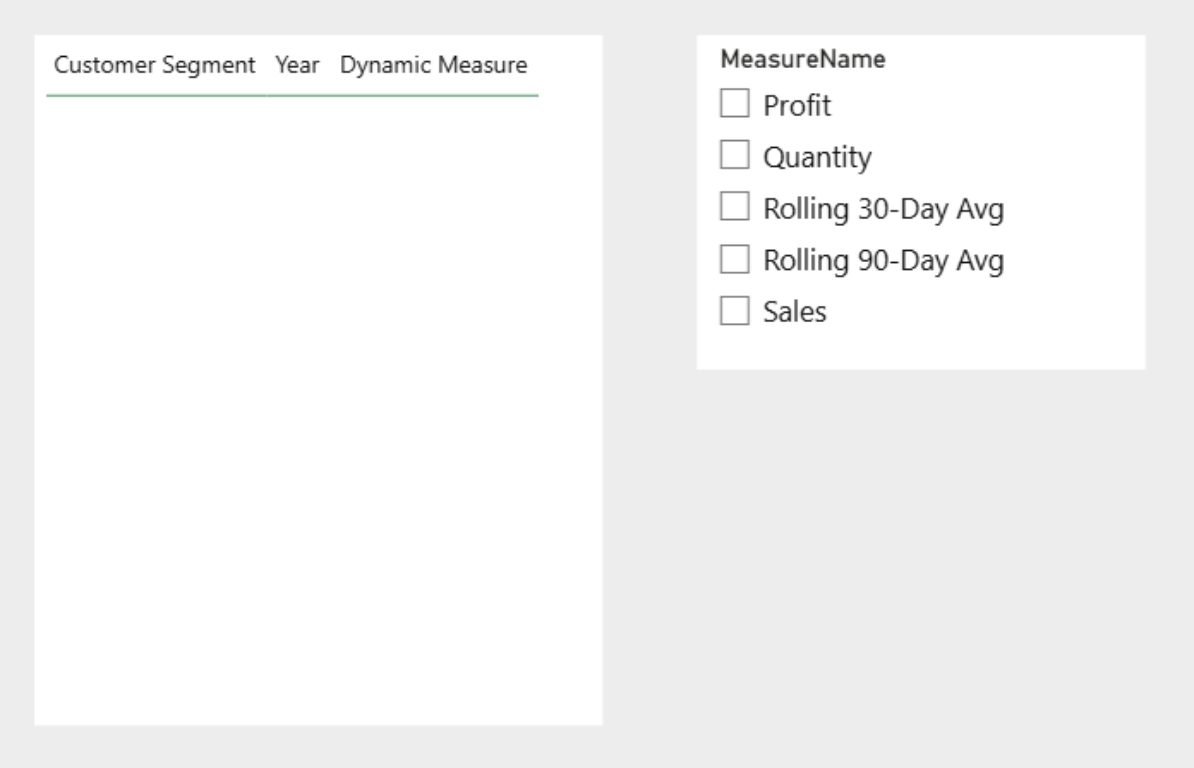
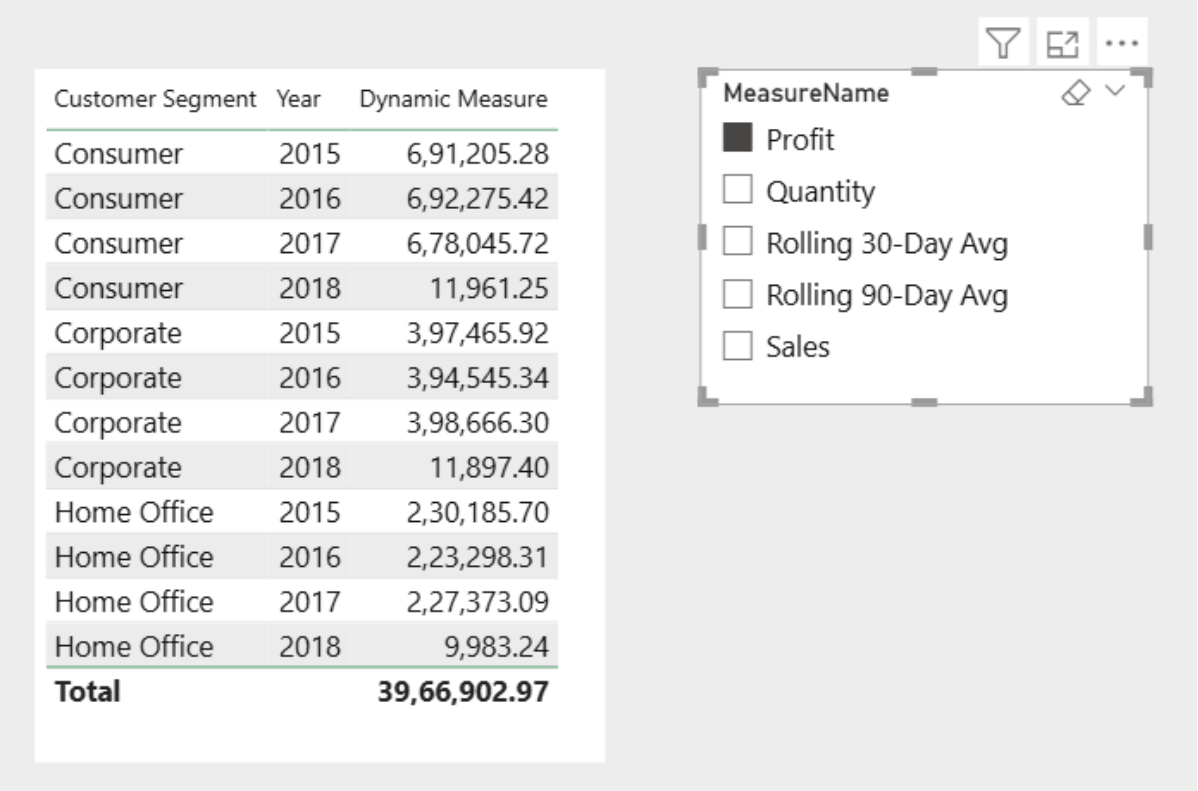
Dynamic Measure

1. Without dynamic measure



2. After Applying dynamic measure: When you select Profit in the slicer, visuals show Profit; switch to *Profit* or *Quantity*, and they update instantly.



Customer Segment	Year	Dynamic Measure
Consumer	2015	6,91,205.28
Consumer	2016	6,92,275.42
Consumer	2017	6,78,045.72
Consumer	2018	11,961.25
Corporate	2015	3,97,465.92
Corporate	2016	3,94,545.34
Corporate	2017	3,98,666.30
Corporate	2018	11,897.40
Home Office	2015	2,30,185.70
Home Office	2016	2,23,298.31
Home Office	2017	2,27,373.09
Home Office	2018	9,983.24
Total		**39,66,902.97**

3. Quantity

Customer Segment	Year	Dynamic Measure
Consumer	2015	71,654.00
Consumer	2016	71,766.00
Consumer	2017	54,745.00
Consumer	2018	1,069.00
Corporate	2015	42,317.00
Corporate	2016	41,221.00
Corporate	2017	32,403.00
Corporate	2018	619.00
Home Office	2015	24,509.00
Home Office	2016	24,365.00
Home Office	2017	18,976.00
Home Office	2018	435.00
Total		**3,84,079.00**

How to Create Dynamic Measure:

1. You need a table that lists the measures you want to toggle between.
2. Create Table:

```
Measure Selector =
DATATABLE(
  "MeasureName", STRING,
  {
    {"Sales"},
```

```
        {"Profit"},
        {"Quantity"}
      }
    )
```

3. Create a Slicer
4. Add created table
5. Create dynamic measure using SWITCH DAX Function

```
Dynamic Measure =
SWITCH(
  SELECTEDVALUE(MeasureSelector[MeasureName]),
  "Sales", SUM(FactOrders[Sales]),
  "Profit", SUM(FactOrders[Order Profit Per Order]),
  "Quantity", SUM(FactOrders[Order Item Quantity])
)
```
